

“K2Analytics provides Mondy with significant application and risk management benefits with regards to its group-wide (and global) financial consolidations / reporting. Their Hyperion expertise will add value to our infrastructure environment and improve support to our user community”

- **Chris Crutchley**
Sr. Financial Analyst
Mondy plc

Pinnacle provides a unique opportunity by offering Business Performance Management solutions which leverage the best of Industry leading Oracle | Hyperion Solutions suite of products, on an online subscription basis. This web-based hosted model gives companies an affordable, scalable solution for meeting financial consolidation and business analytics which, until now, only the largest of organizations could afford. There is no faster, easier way to get online and in touch with the reasons behind the numbers. Pinnacle makes the future possible.

THE “ICEBERG EFFECT”

- TCO Is Not Just The Costs of Licenses = maintenance, hardware, consulting, IT resources and training
- Significantly Reduce OpEx and CapEx
- Minimal Start-up Costs
- Eliminate Your Costs For In-house Expertise and Infrastructure
- Initial Cost savings of 50%, On-going annual Cost Savings
- Reduced rate customization of Application
- Best of Class without Sacrificing Due to Cost

“K2Analytics BaseCamp saved our project! We had an extremely tight timeline to implement HFM before year end, but we were delayed by the hardware procurement process. BaseCamp enabled us to start our build in 3-days and kept the project on track.”

Michael Regan
VP Affinion Group

OUR DATA CENTER

All too often a company finds out when it's too late that its data center did not take the proper precautions to back up and secure critical financial data. At Pinnacle, we understand this because we are often called in to help companies recover vital applications and/or data. Our Hosted solutions are monitored 24 hours 7 days a week, with redundant procedures that guarantee no loss of data. This includes a full replication of application functionality to a second secure location. Our procedures adhere to SAS-70 standards so our client can rest easy that all precautions are being taken.

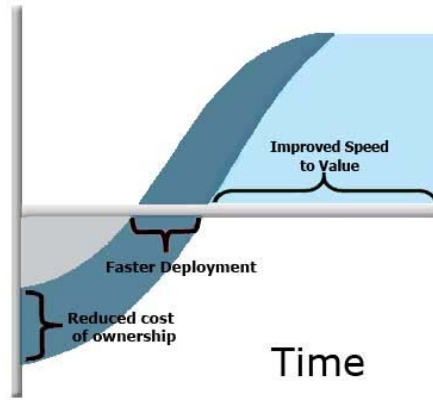

Hosting with Pinnacle eliminates the need for an expensive expansion of your data center that might be needed in order run leading-edge Business Performance Software. Leaving the data center servicing tasks to Pinnacle allows you to concentrate on building your business not your infrastructure, converting variable IT cost to a fixed monthly fee.

ABOUT K2ANALYTICS
